

Bi-Parting

Bi-Parting cavity slider with glazed doors

Bi-Parting

Features

Bi-Parting detail involves two cavity sliders installed so that the two doors slide from separate pockets and meet in the middle.

CS TrackSystems and Automatic Units can also be specified as Bi-Parting units.

Options

Create a unique solution to your requirements by incorporating CS Detail Options into your design. Bi-Parting detail is available with most CS Cavity Sliders, Automatic Units and Track Systems.

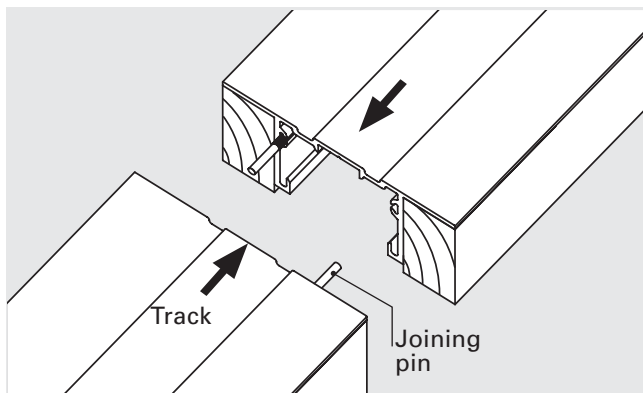

Hardware options

Check out the **CaviLock** range of architectural hardware options available for Bi-Parting units.

Technical Detail

1. Install cavity slider as per the standard Installation Instructions for a Bi-Parting cavity slider.
2. Ensure track alignment pins are used when installing to ensure accurate alignment.

3. Ensure the track is securely fixed to the support structure above before hanging the door.

Drawings are not to scale.
